

2- axis Deflector **Standard** Package (DTSXY-xx-xx)

- Larger modular design with two blocks orthogonally stacked and mounted on the same baseplate.
- Adjustments are available for each block.
- The two blocks can be separated.

2- axis Deflector **Compact** Package (DTSXY-xx-xx-002)

- Compact design integrating the two crystals mounted orthogonally inside.
- The two RF inputs located on the same side of the deflector.
- Intend for situations where space is limited.

Comparison Table

Features	Compact Package	Standard Package
Size/Design	Smaller, Compact	Larger, modular
Connectors	2 SMA on the same side	Distinct positions
Adjustments (angles)	The whole module	Individual blocks
Performance	same	same
